ROYAL TOURISTS LEAVE ENGLAND.

Crowds Cheer the Departing Prince and Princess.

OFF TO INDIA.

The King and Queen Drive to the Station To Bid Good-Bye.

There was but little ceremony in connection with the departure of the Prince and Princess of Wales yesterday from Victoria, when they started on the first stage of their long tour in India.

But, though there was no display of pomp and circumstance, there was a very real display of heartfelt and loyal feeling on the part of those assembled to bid their Royal Highnesses "God-speed."

At an early hour thousands of spectators assembled along the line of route-the Mall, Buckingham Gate, and Victoria were black with people, and in the neighbourhood of Victoria Station even the roofs of the houses were crowded with enthusiastically loyal spectators.

The interior of the station had not been decorated, but a portion was railed off and carpeted with red baize. Here were gathered the 600 friends whom the Prince and Princess had specially invited to witness their departure.

Amongst others who arrived early were the Austro-Hungarian Ambassador, the Earl of Pembroke, the Earl of Clarendon, the Marquis and Marchioness of Lansdowne, the Duke of Portland, Earl Howe, Earl of Denbigh, and many other well-

THE KING'S "GOOD-BYE."

Nom after eleven their Majesties the King and Queen drove up to Victoria Station from Bucking-ham Palage unescorted. In fact, many in the crowd hardly realised that their Majesties had passed by. The King, who was looking very well, were a dark overcoat, while the Queen was clad in credents.

A few minutes later, amidst a hearty burst of cheering and the waving of hats and handkerchiefs, the royal tourists drove up in an open travelling

the royal tourisis drove up in an open travelling carriage.

The Princess, wearing a costume of navy blue, and looking in the best of health, smilingly acknowledged the loyal outburst, whilst the Prince, who appeared somewhat grave, frequently raised his hat in answer to the cries of "Good-bye!"

Arriving in the front courtyard the royal party immediately entered the royal waiting-room, to which, by the King's special request, only members of the royal family were admitted. Here, in private, the real family leavetakings took place.

After the King and Queen had bidden farewell they left the waiting-room and inspected the royal saloon, whilst the Princes Francis and Alexander of Teck, brothers of the Princes of Wales, said good-bye. Then the Prince and Princess, both visibly affected, bade farewell to the many friends assembled outside, and finally entered the saloon. Until the signal for departure was given the King shood by the door chatting to them. Then, as the train steamed away, hearty cheers again broke out as the Prince and Princess of Wales waved their last farewells to his Majesty, who, with raised hat, watched the departing train.

RECEPTION AT DOVER.

RECEPTION AT DOVER.

The royal train arrived at Dover at 1.25. Here a great reception awaited the Prince and Princess. The landing-stage and its vicinity were gaily decorated, and a great crowd assembled to cheer the travellers. After being received by the mayor and other officials their Royal Highnesses embarked on the turbine steamer Invicta.

The cross-Channel-passage was very rough, but the steamer made a splendid voyage in fifty-four minutes, reaching Calais at half-past two.

From there they went by train to Paris, arriving at the Gare du Nord at seven o'clock on their way to Genoa, and passing round by the belt station to the Lyons station. The British Ambassador met them to pay his respects.

The following is the time-table of the tour until Bombay is reached. This evening, at Genoa, their royal highnesses embark on board H.M.S. Renown; Port Said, 8.0 a.m., October 27; Suez, 8.0 a.m., October 29; Aden, noon, November 9.

The local authorities at Genoa will not be present when the Prince and Princess arrive, as they are travelling through France incognito.

The recent rainfall has removed anxiety in India, and preparations. throughout the country are proceeding apace.

and preparations at Houghout the county are pro-ceeding apace.

The Prince of Wales has sent strict orders re-garding the careful observance of Sabbath, and, when their Royal Highnesses are travelling on that day the train will be stopped during the time of Divine service.

NORWAY'S THRONE.

Crown Offered to Prince Charles of Denmark.

REPORTED ACCEPTANCE.

News reached England yesterday from unofficial sources in the Danish capital that Prince Charles of Denmark, husband of the popular Princess Maud of England, has accepted the offer of the vacant Throne of Norway.

The election of the new Sovereign is expected to take place at an early date. Reuter's Christiania correspondent says that of the members of the Government only M. Gunnar Knudsen, the Minister of Finance, is opposed to the immediate holding of the election of a King for Norway.

holding of the election of a King for Norway.

In Parliament between eighty and a hundred members are said to be in favour of the proposal. An important dispatch received in Copenhagen from Christiania led to a Council meeting under the presidency of the Crown Prince being held at the Amalienborg Castle, It lasted two hours. It is known that the dispatch had reference to the candidature of Prince Charles of Denmark for the Throne of Norway. It is believed the dispatch contained a formal offer of the Crown to Prince Charles, and it is reported that the answer dispatched at the end of the meeting was an acceptance.

ANOTHER ENGLISH OUEEN.

King Edward's Daughter May Ascend the Throne as Consort.

Verification of the news that Prince Charles of Denmark is to ascend the Norwegian Throne means that Norway will have an English Queen for the first time in its history.

Prince Charles's wife, it will be remembered, is Princess Maud, daughter of King Edward and is Princess Maud, daughter of King Edward and Queen Alexandra. She was married in 1896 to the second gon of the Danish Crown Prince, and they have an only son, who was two years old last July. Sweden, the neighbouring kingdom, also has a British Princess in the person of Princess Margaret of Connaught, who is married to Prince Gustavus Adolphus, eldest son of King Oscar's heir.

THE KING AT NEWMARKET.

After Bidding Farewell to the Prince, His Majesty Sees Some Interesting Racing.

The King went down to Newmarket in a special train to see the third stage of the meeting yesterday. His Majesty left St. Pancras Station at 11.20, and, motoring from the new station, arrived on the course in time to see the two o'clock race.

His Majesty immediately proceeded to the private stand in the Jockey Club enclosure, and watched with interest the great contest in which Lord Derby's Canterbury Pilgrim filly beat Mr. Arthur James's Pitration.

Arthir James's Flittation. There was a very small gathering of the general public, but the numbers in the Jockey Club enclosure were as on the Cesarewitch afternoon.

Comparatiyely few horses competed, but their quality sustained a high interest, and the King re-remained to the end of racing.

GALLAY COMPLAINS OF FALSE FRIEND.

Stole £600 and Went to England-Search by London Police.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Thursday.—Gallay, the absconding bank clerk, who sailed to South America in a yacht with the proceeds of his robberies, has made an important confession. Hitherto he has refused to give the name of the mysterious friend who nelped him to forge the documents used in his frauds, and assisted him in hiring the yacht in which to make good his escape.

Now he has stated, to the great astonishment of the police, that it was a man named Eugène Julien le Rendu. This man is well known to the police, having served terms of imprisonment for complicity in a famous espionage case of some years ago. Since Gallay's affair became public property he has fled from France, but a warrant has been issued for his arrest, and the English police are searching for him.

HASTY TRIP TO LONDON.

Gallay's story is that he knew a certain Victor le Rendu, who told him he had a brother, then in le Rendu, who told him he had a brother, then in London, who was not troubled with a very delicate sense of honour. Gallay got this man's address in a cutious way. He came across it in a blotting-book belonging to M. Le Rendu. A hasty trip over to London followed. Gallay found the scoundrel in poor circumstances, brought him in disguise over to Paris, clothed him from head to foot in fashionable garments, bought him a 44 Panama hat and diamond rings, and employed him to forge the necessary documents. Finally, he gave him 440 and sent him to hire a yacht.

yacht.

At this point the one rascal tried to deceive the At this point the one rascal tried to deceive the At the Le Rendu did not buy the yacht, but stole a sum of money from his accomplice, and returned to London, Gallay has not seen him since.

Galley was very bitter about this base conduct of his friend and protegé. "He has taken 4600 of mine," he said plaintively; "it is a scandalous breach of faith. The beast! And I have given him so many good dinners."

Gallay says he gave comparatively little money to Mme. Merelli, but once, to give her a pleasant surprise, he put eight banknotes of £40 each in her glove-box.

Sahara's Ruler Declines To Accept £40,000 Due to Him-Except Imperially.

(FROM OUR OWN CORRESPONDENT.)

Paris, Thursday .-- A curious case has just been settled by the Official Court in Paris. Jacques Lebaudy, "the Emperor of the Sahara," is interested with his two brothers, Paul and Pierre, in a refinery business at Ancona.

Jacques has broken off all connection with his Jacques has broken off all connection with his two brothers because they do not address him as "Emperor of the Sahara." He has even refused to receive his share of the profits, amounting to £40,000, unless sent to him under his self-appointed title.

As the business of the company is suffering, the two brothers asked the Court to order the company to be wound up, so that Jacques might be bought out. The Court granted the application.

At 9 3.m., vesterday the fifty-six French councillors left the Municipal Club in Whitehall, and
were driven to inspect the site of the new L.C.C.
Hall.

DEJEUNER ORDINAIRE.

From there they journeyed, in cars gaily decorated with the French Tricolour, to the New Cross car-sheds of the London County Council. Thence they went on to Carrington House, Dept ford, where they lunched. The fare was exactly the same as that which the ordinary lodgers receive, and the French delegates expressed their surprise at the perfection of the arrangements in the great lodging-house.

Afterwards they went to Blackwall, and passed through the tunnels there, and so by boat back to Westminster.

An invitation to visit Edinburgh has been declined with extreme regret by Dr. Brousse and his colleagues as time does not permit them to visit the Scottish capital.

Dr. Brousse has forwarded to one of the women injured by a runaway horse in Aldwych on Wednesday the sum of 250 francs (£10):

FAULTS OF THE ENGLISHWOMAN.

How She Appears to a Fair Visitor From Japan.

SELFISH AND UNFILIAL.

Japanese women are to have their polytechnics and schools of domestic economy in the very near future; and the onus of their successful introduction will rest to a considerable extent on a dainty young Japanese lady, Miss Sumi Miyahawa.

This girl was sent to London three years ago by the Japanese Government to study English domes

The first two years of her course she spent at the Battersea Polytechnic, going all through the prac-tical work with the exception of teaching. She learned to sew as the English do, to make dresses, to cook, to housekeep, and to play games there.

The third year she has spent at Bedford College, York-place, studying, amongst other things, the character of the London university girl. In between whiles she has visited private families.

NOT POSSIBLE IN JAPAN.

And the conclusion she has arrived at is that neither in this generation nor the next will the life of the English home be possible in Japan. Neither would she wish it to be.

"I see in both Japanese and British homes many

would she wish it to be.

"I see in both Japanese and British homes many great faults, and equally many excellent points, she said. "With us we have two great rules—love of Emperor and country, and filial piety. Here I find very little filial piety.
"In Japan, when a man marries, his wife goes to his parents house. She has no personal money, neither has he. The son gives all the earnings to the parents, and they control the home, looking naturally to the son to provide money when they are too aged to do so themselves.

"In England I see a man going away with his wife. They live their own lives apart, spend their own money, and, if wise, put by for their old age.
"I also see some fathers and mothers ending their days in the workhouse while the children and grandchildren go without.
"At the same time our life ties us to ur parents too much. It prevents us being individuals. We cannot colonise and earry the sweetness of our homes with us as you do. Presently each young family will have its own home, but we must never, in adopting this idea, lose our filial piety."

BLAMING ENGLISH MOTHERS.

BLAMING ENGLISH MOTHERS.

BLAMING ENGLISH MOTHERS.

Miss Miyahawa also finds that the poverty of the Japanese middle-clases makes our manner of living impossible in Japan.

"You are so rich here, she says, and so extravagant. You do-not do as much in your own homes as we do. Your dressmaking goes out, your laundry goes out, you have many servanls and nurses for your children."

In Japanese mothers are really mothers, thinks this little lady. She does not always admire the English mother, and her soft, gentle voice rises and her eyes sparkle with indignation when she asks, "What is the use of all your consumption cures, of the stamping out of smallpox, when the infant mortality increases so fearfully, only because the mother? gives her baby cows milk?"

The publication of "The Harmsworth Self-Educator"-the first fortnightly part of which will be ready on Tuesday next, October 24-marks an era in the progress and development of modern educa-tion. It is universally admitted that the acquirement of knowledge for its own sake, or as a mere species of mental gymnastics, fails to fulfil the requirements of the present age. What is needed is the training of the intellect to apply itself to the practical purposes of every-day life. This is what

practical purposes of every-day life. This is what "The Harmsworth Self-Educator" comes to do. Complete courses of practical instruction in all the arts and sciences, the leading professions, the principal trades, and all the subjects with which a man or woman eight to be acquainted are provided in "The Harmsworth Self-Educator," which will be published in fortnightly parts at sevenpence. Each part will contain 160 pages, profusely illustrated, Part I. containing over 100 illustrations, including four full-page cloured plates, and dealing with some twenty-seven different subjects.

The investment of the nominal sum of one half-penny per day is, therefore, all that is needed to procure the greatest work of technical and general education that has ever been offered to the public. "The Harmsworth Self-Educator" is emphatically the most valuable work on the market, for it affords a complete guide to success and fortune.

FALL IN KAFFIRS.

Selling Orders Reach London from Paris and the Cape.

HOME RAILS FIRM.

CAPEL COURT, Thursday Evening .- Any semblance of joy was quickly turned into mourning. to-day. London stood to be shot at. Paris threw over Kaffir shares, and the Cape followed suit, and with a lot of option shares coming to market, and not being wanted, with forced closing of accounts, and with the talk of a big deceased account in the market, Kaffirs looked about as rotten as they have

market, Kaffirs looked about as rotten as they have done at any time recently.

**The Mexican gamble also showed signs of collapse, and other mining markets were simply left alone. In vain did the "bulls" talk of a coming good Goldfields report in the Kaffir, market next month. Nobody was in the mood to be comforted. All that can be said favourably is that Kaffirs closed above the worst.

It was an equally ghastly exhibition in Americans. Mr. Lawson was on the warpath again, with predictions of the imminent collapse of copper. Nobody worried much about him, but what did cause concern was that New York was selling American Rails at first, and nobody wanted then here. Most of the selling, however, came from the Continent.

the Continent.

There were some nasty falls, and the usual wild rumours, and even the sober-minded asked plaintively what it all meant, and what was the bad news coming. Here, also, the close was above the

TRADE LESSONS OF TRAFFICS.

TRADE LESSONS OF TRAFFICS.

Gircumstances — mock at predictions: We were all to have been happy if the Bank rate was not raised. But 'in spite of that, and in spite of quite a respectable Bank Return, Consols could make very little headway, and closed a heavy market. The only section that really went shead was the Home Railway market. Here the dealers seem to be awakening to the trade lessons of yesterday's traffics, and a moderate amount of investment business came along. So prices were lifted, with the market fancies running in the direction of Midlands, North-Westerns, and Socitish stocks. However, the surroundings were too much even for the Home Railway market in the afternoon. Most prices, however, are better for the day.

CHINESE LAND GAMBLE.

The gamble in Chinese land shares is, happily, checked, and a nasty weak speculative account is still open in some of them. To-day Pekins, Shansis, and the rest of them looked uncommonly flat. Of course, with Canadian Rails weak with Americans, Hudson's Bays dropped back in sympathy.

Americans, sympathy.

One of the minor sensations of Miscellaneous descriptions was the sharp rally in Brunner Moud shares on a 35 per cent, per annum dividend and the calling up of the unpaid capital on the partly-paid shares. These latter rose promptly to 6½,

the calling up of the input expansion of 62, and the others to 72. Some discriminating purchases are being made in shipping and other sections likely to benefit from improving trade, and the firmness of the bank shares is a tribute to the same considerations.

Foreign Rails, of course, had their excitement. To-day, however, some of it was of the wrong kind. There was some forced selling in the Asgentine group, for instance. The United Havana dividend was not quite up to expectations, but it is thought that there will be a bonus in connection with the new share issue, and so the Frederica stock rose to 209. At the Western of Havana meeting the new capital proposals were approved. The Cuban Central is issuing new capital. Brazilian Rails are not quite so good because Brazilian exchange is lower, but bankers and others speak most hopefully of Brazilian prospects as a The Rio Tinto meeting was a loss to the same and the same transfer of the same and the same transfer of the

whole.

The Rio Tinto meeting was a lesson in the apathyof shareholders when things are going well. In
spite of the large shareholding body and the new
capital proposals only eight shareholders put in an
appearance at the meeting. They approved the
new sutgestions, but as the directors are taking
full advantage of the company's credit in fixing the
issue price the market did not see much bonus in
it, and marked the shares down. The metal was
lower, and that helped to depress all copper shares,

LABOUL'S DAY OFF.

7 ORK was stopped yesterday at many factories in Gloucestershire, and the city of Gloucester made .t a holiday, because the New Zealanders were playing football there. Certain solemn people are wagging their heads gloomily over this. One of them writes to us lugabilously on the subject this morning: To all these good people we would give Carlyie's advice: "Clear your minds of cant."

Why should it always be thought so undesirable for the working man to take a day od? Nobody writes to the papers when judges go to Epsom or Newmarket mstead of to court. The of attending to business, and all people say is,

Everybody who is able to leave his work takes a holiday now and then. You find any number of business men watching cricket at number of business men watching cricket at Lord's on a fine summer's a ternoon. enjoys a change from business ine?

Of course he does, and equally, of course, he would reply: "Ah, yes, but that is different." It is not different at all. Working men both like and need holidays just as much as anybody else, and they get fewer of them. People like "Manufacturer" regard working men as machines which, once get agoing, will keep act it until they run down. Holidays are all right for other people, but if the working man takes one—"thus is why the country is going to the dogs."

SAYINGS OF NELSON.

In my opinion, nations, like individuals, are to be won more by acts of kindness than cruelty. It is the custom, and a very bad one, for the English never to tell their own story.

THIS MORNING'S GOSSIP.

HERE is something very humorous in a Vienna paper's reference to Lord Lans-downe's "stormy and passionate temperament." It shows how much the Austrian attack upon our Foreign Minister is worth. Of all men Lord Lansdowne is, in public life at any rate, the most suave and calm. His speeches are conversational, his manner that of a man discussing politics on his own hearth-rug. The nly time I ever saw him annoyed was when an officious messenger had teated an Ambassador with scant courtesy, and even then he still spoke in his customary gentle

Incidentally he introduced the late Shah to the delights of skating, or rather the Shah saw Sir Mortimer skate, and de cided that it was a graceful exercise which might properly be indulged in by his Ministers. I hardly think the Ministers looked at it in the same light, for his Majesty, having borrowed pairs of skates from the Legation, made his courtiers put them on and attempt to skate on the lake in the palace grounds. Their first efforts were highly mirth-provoking to the Shah, who sat at the edge are now under supervision. A good many people have tried to rewrite the New Testament, but no one has ever succeeded in elling the s.o. y of the line of Christ with one-half he beauty and direct paths of the Bible. The latest to make the attempt is a German author alled Rosegert, whose effort, translated into commonplace English, is published by Hodder and Stoughton under the title "I.N.R.L." (6.) The p blishers assue us on the cover that it is a greatwork, but to my mind it would be a poor taste which should prefer this version to the Bible. Mr Roseger attempted an impossible task. This habit of supplying readers with criticisms ready-made is an importation from France, and a ily one at that. For instance, it puts one against "Kitry and the Viscount" (Gay and Brid, 6.) to rend a publisher's statement that it "will undoubtedly be widely read." However, if you nerse-ere, you will find it a ratting, ingenuous ale of an earl's som who works in an engineering "shop," and dearly loves a young woman who has been "truined," all unbeknownst to him, and to her too, by his brother. There is a fine mixture of authors in "Underneath the Bough" (John Lane), a book of "ee-gant extracts." Those who find help and comfort in reading a for of detached thoughts about the nobility of earning one's living, and the pleau es of the open air, and the nature of true love, and so on, will be grateful to Miss Theodora Thompson for compiling he pretty litte volume.

Mr. Leighton Leigh doesn't believe in the unemployed. So he writes a slashing and, I must add, a very readable attack up on them in "B other East and Brother West" (Heinemann, 38, 64.). Much of his sa casm is wel directed, though when he declares that farme's are emigrating because they cannot get labourers one's eyes open rather wide. And it isn't all factory girl-who go to the theatre "two or three times a week." Still, if it is exaggerated, it is enter airing.

I wo cheap ceprints, which are sure to be popular, come from Messrs. Cassell. One is Major Arthur (Giffith's "Fifty Vears of Public Service," full of good stories and odd recollections of a pri on in-spector's life. The other is Mr. Barrie's "Little Minister" (28, net). It is a handy pocket-volume, but not so pleasantly printed as John Long's Carl-on Classic, which sow include Macaulay's "War-en Hastings" and Thackeray's "Four Georges," and Byron's "Childe Harold." Of all outdoor occup tions perhaps those of the Mason, Stonetrimmer, Bricklaver, Ouarryman, etc., are the least enviable. The high rate of pay attracts many young men, who enter the callings regardless (or, perhaps, unconscious) of their detrimental influence upon the health. These workers live, so to speak, in an atmosphere containing small but exceedingly sharp particles of stone-dust, which they must necessarily inhale day after day, year in and year out. Who has not experienced the pain and irritation caused by a mere speck of dust lodging in the eye, and how the eye becomes inflamed if the offending substance is not speedily removed? In the case of the lungs, should these be at all weakly, they CANNOT THROW OFF the inhaled particles of dust. "Dustnests" are then formed, which cause inflammation or festering centres. But with this there may be no pain, for the simple reason that the lungs are absolutely devoid of nerves of feeling. They may, in fact, be thoroughly decayed without the person experiencing the least pain during the process of decay. There are, however, certain unmistakable symptoms, for the tendency of all organic line is toward health, and Nature warns us by these symptoms or "danger signals" that something in the system needs immediate attention. One symptom is a dry cough; sometimes there is expectorationwhite at first and yellowish afterwards. Other symptoms are palpitation of the heart, digestive troubles, light sweats, weariness, loss of appetile, e. sit veress to cold, etc. These symptoms may not always be present, however; but just as stone is worn away by the constant dripping of water, so the system gradually wastes away by the continued action

Organs, on application, post free, and under cover. This book proves conclusively that all forms of Chest diseases, even in advanced stages, can be permanently circle by natural methods. The Weidhaa, Institute does NOI believe in drugs and quack remedies. Such so-called "curatives" are mostly poisons, and the fact is that nevey goog taken diminishes the parients' vitaitly. This is only reasonable—one cannot expect anything else. Prof. Weidhaas, who founded the Institute, cured himself of a severe lung complaint after being given up by eminent physicians. That is such he devoted his life to the study of chest complaints. It is also the reason why hundreds who have found themselves in the same prinche condition have adopted the Weidhaas treatment, with the result that a permanent cure has been effected. It is said that ch onic lung diseases CANNOT be cured, that in this Institute the.c is abundant proof of what commansence treatment and commonsens enchods. HAVE done, and can do, even in very advanced cases. Some of the testimony may seem increalible, but it is revertheless true. One cannot ger over positive facts and living witnesses. Every day letters are reviewed from old patients stating that they are keeping well—an irrefutable proof that the treatment does not merely allay symptoms, but actually endicates disease.

The Weidhaas Method is unique in that it can be carried out in patients' own homes without in any way interfering with one's occupation. Its cost is not prohibitive; it does away with expensive railway journeys and the arxiety caused by absence from home. It teaches Hygiene too, and that project of immense advantage to every member of the family. If any person has As ham, Consumption, B ouchitis, or any other lung disease, he should read what the Weidhaas book has to say on the subject. Should you know of any suffering friend drop a postcard with the name and address, asking for a free book to be sent.

Middle Doors on the District. Its rumoured that the doors in the middle of each side of the new cars on the electrified District Railway are to be done away with very soon, when the space they at present occupy will be filled with seats. Few passengers make use of them, and at times they fail to answer to the automatic control. Another drawback is that in making your exit you are apt to be caught between them as they close. In case, however, of the necessity arising for emptying a train rapidly they would be a very valuable provision.

dents as that which has just resulted in the com-pulsory resignation of two constables are procuring the force a worse reputation than it really deserves. The lot of the Birmingham policeman is not a happy one, for probably in no town in the kingdom does he run greater risks of brutal assaults from "hooligans." Only a year or two ago a perfect reign of terror existed, and in some of the rough quarters of the city a constable never knew when he might be attacked from behind and given in-juries which would cripple him for life.

Temperance Crusades by Placard.

The system of setting forth on public placateds the injurious effects of alcohol in regard to physical deterioration which was recently adopted by several London boroughs, is now being imitated in the provinces, and at Swansea a resolution in favour of this form of temperance crusade has been passed. One member of the placards also, pointing out that 90 per cent-of the cancer prevailing in this country was attributable to the abuse of tea.

Pigeon-Fanoier's Triumph.

Having created as "corner" in English owl pigeons, Mr. John Brayshaw, a Keighley mechanic, has just sold his stock of 117 birds at auction for no less than £800. With his pigeons he won from £70 to £80 a year in prize money; his sales have averaged about £100 a year, and he has carried off no fewer than twenty-three silver cups and other awards, including the eighty-guinea Esqualant trophy at the Crystal Palace, presented in memory of one of the most famous pigeon-fanciers in the land. It was found impossible to beat Brayshaw's birds, and so powerful did he become that he caused almost a slump in the trade.

A Secret Commission.

A Secret Commission.

There is much comment upon the fact that secret sittings are being held by the Royal Commission appointed to inquire into the administration of the Motor-ear Acts and the conduct of motorists. A bare synopsis of the evidence alone is issued after each sitting. As Parliament will have to discuss the whole question of motor traction again next year it seems important that the evidence, given as

it is by interested parties, should receive immediate publicity. Statements which may deserve contradiction will now go unchallenged.

Municipal Theatre and Newspaper

Even the London County Council would hesistate to embark upon municipal trading to such an extent as prevails in some Continental cities. For instance, at Freiburg, a town of 70,000 inhabitants in the Grand Duchy of Baden, the municipality now owns the local railroads, goas, electric light, water supply, a pawnshop, a savings bank, schools, cemetery, building plots, forests, vineyards, a daily newspaper, and a theatre.

The Giant Had the Laugh.

The Giant Had the Laugh.

An amusing incident in connection with the opening of Kingsway is related by the London correspondent of a provincial newspaper. He noticed among the crowds lining the kerbstone of the Strand a man of unusual stature—quite the tallest man he had seen outside a show. A police-inspector who was passing on horseback addressed the man reprovingly: "Come, now, you get down, I tian't allowed. You know that as well as I do." "I'm not doing anything," said the large man. "You get down off that box, I tell you. Have a little more care of the people behind you," insisted the inspector with an increased severity in his voice. "I don't know what you mean by a box," replied the seven-footer. The inspector wasted no more words on him, but beckoned imperiously to a couple of constables on foot. They advanced with dignified celerity, only to discover that the big man had spoken the truth. Then a titter went up from the crowd, and the inspector suddenly discovered that he had important business further down the street.

and Affects the General Health

In very many cases worry and anxiety lead to a
weakened and worn-out condition of the nervous
system. If too heavy a strain is put upon your
nerves you cannot help feeling miserable and wanting in energy. You will not be able to do your
work properly; very likely you will be unable to,
sleep at night because you still worry when you
ought to be resting. If that is your condition itshows clearly that your nervous system is tired out,
and if you are not careful you will break down.
Don't fancy that you can get better without your
nervous system being put right. We will now tell
you just what you ought to do.
What your nervous system really requires is rebuilding, and to effect this the nerve tissue and
brain needs special nourishment, to supply what
you have lost under the strain which has been put
upon it. Unfortunately the exhausted

That is exactly what you get in Bishop's Tonules, and that is why they are so wonderfully successful.

and that is why they are so wonderfully successful.

WHAT BISHOP'S TONULES DO

After Bishop's Tonules have been used for a short time the appetite improves, food is better digested, the liver is stimulated, and the flow of bile is increased. All the various organs of the body do their work better, your eyes get brighter, your feel better, or, as one writer said in his letter, you feel better, or, as one writer said in his letter, you feel that you are "a new man."

Not only do Bishop's Tonules supply food to the nerves and brain, but by the strength they give the nerves they enable them to extract from the food further supplies of the elements they have lost, and still further strengthen themselves.

LEAGUE FOOTBALL REVIEWED

Form in the International-Chelsea's Fine Position-To-morrow's Prospects.

The English League team, though easily beating the Irish, played far below club form, and one is afraid few of the eleven will represent their continy in the Inter-national against Scotland.

In the first half the Irishmen were quite as good, and, in fact, a trifle better than their opposients, but their lack of stanina; told, and must be put down as the reason for the improvement of the home side on change

reason for the improvement of the home side on change of ends.

Maskrey, in goal, did all that was asked of him, but Glover and Burgess were not up to form, and of the halves, Sands, I regret to say, was a failure, whilst Makepeace and Bradshaw, though doing many clever things, are not likely to displace other candidates for their positions in the forthcoming internationals.

Dorsett and Hampton were by far the best of the forwards, and the first-named made a great impression.
